This virtual "class participation" will allow you to apply principles you learn in the week's lesson. Past students in Meteo 101 often remarked how rewarding it was to be able to accurately forecast weather a continent away. Or, if their forecast didn't work out exactly the way they had planned, they gained an appreciation for how challenging weather forecasting can be. It's a win-win ...

Meteorology is a branch of the atmospheric sciences which includes atmospheric chemistry and atmospheric physics, with a major focus on weather forecasting. The study of meteorology dates back millennia, though significant progress in meteorology did not occur until the 18th century. The 19th century saw modest progress in the field after weather observation networks were formed across broad ...
